

Department of Computer Science

Federal University Lafia

First Semester Examination

Session: 2017/2018

CSC111: Introduction to Computer Science

Date: 5th April 2018

Time: 1½ hrs.

Instruction: Attempt all questions. Shade the correct option in your answer sheet. Clearly write your matriculation number and your department in the fields provided in the answer sheet.

1. The fastest and most powerful computer that processes several quadrillion instructions in a single second is referred to as:

- a. Mainframe b. Server c. Supercomputer d. Mega-computer

2. _____ Computers control access to the hardware, software, and other resources on a network and provides centralize storage area for programs, data and information.

- a. Mainframe b. Server c. Supercomputer d. Mega-computer

3. Which of these is NOT an example of an embedded computer?

- a. Airbag controller b. Remote monitoring systems c. Digital television d. Portable Device Assistant

4. An information system includes all the elements below excluding:

- a. people b. Transactions c. Procedures d. Software

5. The activity of setting up software to work with the computer and other devices is called:

- a. Connectivity b. Programming c. Installation d. Software update

6. _____ tells the computer what task to perform and how to perform them.

- a. Boot-Drive b. Controller c. Processor d. Software

7. _____ is the full meaning of URL

- a. Unified Resource Locator b. Uniform Resource Locator c. Unified Release Locator
d. Uniform Release Locator

8. A program used to find Web pages pertaining to a specific topic is _____

- a. Portal b. Information web page c. Education web page d. Search engine

9. Application integrating text with other media elements is _____

- a. Social media b. Active media c. Multimedia d. Interactive media

10. Which of the following cannot be categorized as Web Community?

- a. Search engine b. Chat room c. News group d. Mailing list

11. Which of the following is a graphic file format?

- a. exp b. fgi c. jpg d. bpm

12. Domain name refers to _____ version of IP address

- a. Graphic b. Similar c. Duplicate d. Text

13. The delivery of education at one location while the learning takes place at other locations is known as?

- a. Remote tutoring b. Continuous education c. Distance Learning d. Location-based testing.

14. Microsoft Office PowerPoint is an example of:

- a. Application software b. Operating System c. System Software d. Utility program.

15. In order for users to create visual aids for presentations to communicate ideas, messages, and other information to a group, they need?

- a. Visual system b. Presentation software c. System software d. Data software.

16. What type of software helps companies record and report their financial transactions?

- a. Accounting software b. Reporting software c. financial software d. Recording software.

17. A note taking software is:

- a. An application software that allows users to store information on the cloud using Internet access.

b. An application software that helps computer scientist carry out simulations and data processing that has to do with drawings.

c. An application software that enables users to enter typed text, handwritten comments, drawings, or sketches anywhere on a page.

d. Application software that has been designed by programmers to help users carry out statistical analysis of data and information.

18. The following are functions of Application software EXCEPT?

- a. To make business activities more efficient. b. To assist with graphics and multimedia projects.
c. To support home, personal and educational tasks. d. To fix computer hardware and network issues.

19. The _____ is the component of the processor that directs and coordinates most of the operations in the computer.
a. control unit b. arithmetic logic unit c. register d. machine cycle
20. A processor contains small, high-speed storage locations, called _____, that temporarily hold data and instructions.
a. flash drives b. registers c. jacks d. heat sinks
21. Supercomputers use _____ for applications such as artificial intelligence and weather forecasting.
a. system-on-a-chip technology b. massively parallel processing c. SCSI d. Accelerated Graphics Ports
22. ROM chips, called _____, contain permanently written data, instructions, or information.
a. memory cache b. registers c. firmware d. transistors
23. _____ interprets and carries out the basic instructions that operate a computer
a. flash drives b. registers c. processor d. main memory
24. _____ is a small ceramic or metal component with fins on its surface that absorbs and disperses heat produced by electrical components such as a processor.
a. flash drives b. registers c. jacks d. heat sinks
25. Video games and computer games use a _____ as the input device that directs movements and actions of on-screen objects.
a. game controller b. pointing stick c. keyboard d. mouse
26. A _____, which is held with both hands, controls the movement and actions of players or objects in video games or computer games.
a. joystick and wheel b. gamepad c. dance pad d. light gun
27. Users running game software or flight and driving simulation software often use a _____ to control an airplane, vehicle, or player.
a. joystick or wheel b. gamepad c. dance pad d. light gun
28. A _____ is a handheld vertical lever mounted on a base in which you move the lever in different directions to control the actions of the simulated vehicle or player
a. dance pad b. gamepad c. joystick d. light gun
29. A _____ is used to shoot targets and moving objects after you pull the trigger on the Weapon.
a. dance pad b. gamepad c. joystick d. light gun
30. A _____ is a flat electronic device divided into panels that users press with their feet in response to instructions from a music video game
a. gamepad b. joystick c. dance pad d. light gun
31. Which of the following uses organic molecules that produce an even brighter, easier-to-read display than TFT displays?
a. HDTV b. LED c. OLED d. LCD
32. One of the following is an example of output containing only text-based document.
a. Drawings & photos b. Music & narrations c. Home movies, live performances d. Letters & reports
33. A touch-sensitive device, resembling a dry-erase board, which displays the image on a connected computer screen is known as _____?
a. projector b. video conference c. Interactive whiteboard d. flatbed scanner
34. The primary disadvantage of multifunction peripheral is that _____.
a. they are very costly b. A breakdown leads to loss c. they need more space d. all of the above
35. All the following are examples of commonly used audio output except one.
a. Speakers b. Earbuds c. Monitor d. Headphones
36. _____ is a small, lightweight, battery-powered printer that allows a mobile user print from notebook computer or other mobile devices.
a. Label printer b. Mobile printer c. Thermal printer d. Postage printer
37. Which of the following is a type of storage device that stores data on a thin microprocessor embedded in a card?
a. a magnetic stripe card b. a smart card c. PCI card d. Expansion card

38. _____ Measures amount of time it takes a storage device to locate an item on a storage medium.
a. storage time b. Capacity c. Access time d. Storage density
39. _____ is not a characteristic of a hard disk.
a. access time b. storage capacity c. cylinder d. Resolution per minutes.
40. Which of the following is not an advantage of solid state drives over magnetic hard disk.
a. faster access time b. faster transfer rate c. short life span d. less power consumption.
41. A _____ is a non-volatile memory that can be erased electronically and rewritten
a. CMOS b. EEPROM c. ROM d. RAM
42. _____ is the main circuit board of the system unit
a. motherboard b. central processing unit (CPU) c. Expansion slot d. chip
43. _____ is a portion of a storage medium functioning as additional RAM
a. CMOS b. main memory c. virtual memory d. extended memory
44. _____ is a small program that tells the operating system how to communicate with a specific device
a. utility program b. trouble-shooter c. drivers d. file software
45. _____ is a program that assesses and reports information about various computer resources and devices
a. computer monitor b. performance monitor c. resource checker d. device reporter
46. _____ is a private combination of characters associated with the user name
a. login b. name ID c. entry name d. password
47. Which of the following is a standalone operating system?
a. windows 7 b. unix c. linux d. all of the above
48. Which of the following is not a server operating system?
a. linux b. Mac OS X c. solaris d. none of the above
49. _____ is an internal network that uses Internet technologies
a. infranet b. intranet c. extranet d. opnet
50. Which of the following is a network communication standard
a. Token ring b. Ethernet c. TCP/IP d. all of the above
51. _____ uses radio signals to communicate with a tag placed in or attached to an object, animal, or person.
a. IRDA b. RFID c. PDA d. CIA
52. Wi-Fi is sometimes referred to as _____
a. 802.67 b. 802.30 c. 802.11 d. 802.20
53. _____ is the full meaning of PSTN
**a. Public switched telephone network b. public swift telecoms network
c. public service telephone network d. private switched telephone network**
54. _____ converts signals between analog and digital.
a. converter b. reconverter c. modem d. deconverter
55. _____ refers to the procedures that keep data current in a database
a. file maintenance b. system maintenance c. network maintenance d. table maintenance
56. _____ compares data with a set of rules or values to find out if the data is correct
a. correction b. modification c. validation d. categorisation
57. _____ contains data about each file in the database and each field in those files.
a. Data dictionary b. record dictionary c. hyperlink dictionary d. text dictionary
58. A _____ consists of simple, English-like statements that allow users to specify the data to display, print, or store
a. data language b. search language c. query language d. record language
59. A _____ is a window on the screen that provides areas for entering or modifying data in a database
a. form b. input c. dictionary d. field
60. _____ allows users to design a report on the screen, retrieve data into the report design, and then display or print the report.
a. report window b. command prompt c. report generator d. report developer
