

FEDERAL UNIVERSITY OF LAFIA
FACULTY OF SCIENCE
DEPARTMENT OF ZOOLOGY
SECOND SEMESTER EXAMINATION FOR 2021/2022 & 2022/2023 SESSIONS
BLY 121: GENERAL BIOLOGY II
INSTRUCTION: ANSWER ALL QUESTIONS
TIME ALLOWED: 1 HOUR

MAT. NO.:

DEPARTMENT: DATE:

1. _____ are the most highly evolved of all plants.
2. The two sub-divisions of spermatophyte are _____ and _____
3. Spermatophytes are dependent on water for their sexual reproduction. True or False?
4. Between angiosperms and gymnosperms, which is ranked as being more successful?

5. _____ produce naked seeds.
6. Angiosperms that produce two seed leaves are known as _____
7. _____ is the area of cell division in a root.
8. The cortex, pericycle, and endodermis are collectively termed _____
_____ tissues.
9. The outermost layer of root cells is called _____
10. The shape of the body of an animal is usually expressed as the _____.
(a) Bilateral (b) Radial (c) Symmetry (d) All of the above
11. The following are characteristics of Protozoans except _____.
(a) All types of body symmetries are present (b) No embryonic germ layers are present
(c) Presence of tissues or organs (d) None of the above
12. The Phylum Porifera has Cellular grade of organization as cells are loosely organized.
(a) False (b) True (c) None of the above (d) No idea
13. Which group of animals are regarded as primitive modern animals or as an evolutionary dead end?
(a) Echinodermata (b) Protozoa (c) Chordata (d) Porifera
14. The following are not members of the Phylum Nematoda except _____.
(a) *Pheretima* (b) *Ascaris* (c) *Asterias* (d) All of the above
15. The Phylum Arthropoda lack an exoskeleton made of chitin.
(a) True (b) False (c) All of the above (d) None of the above

16. In the Phylum _____, the body is divided into head, visceral mass, muscular foot and mantle. (a) Arthropoda (b) Chordata (c) Mollusca (d) Nematoda
17. The phylum Bryophyta comprises three groups of classes namely: _____ and _____
18. The common names for pteridophyte are _____ and _____
19. The dominant form of life in bryophyte is _____
20. Ability of an organism to blend with its immediate surrounding is called _____
(a) competition (b) capitation (c) abaptation (d) adaptation (e) symbiotic
21. Plants found in an environment with moderate water supply are called _____
22. _____ are physical expressions of the genotype and its interactions with the environment.
23. What is the mechanism that brings about opening of stomata at night in some desert plants?

24. The pattern of arrangement in the animal kingdom whereby animals are grouped together based on certain morphological similarities, phylogeny, behavioural characteristics and physiological pattern is called _____? (a) Taxonomy (b) Classification
(c) Niche (d) Ecology
25. Which is the correct order in animal taxonomy? (a) Phylum – Order - Class – species – Genus
(b) Phylum – Class – Order – Genus – Species
