

CSC111 PRACTICAL MANUAL ANSWERS 2020/2021

WRITTEN BY TEASEKID

Exercise 1.0

1. Devices that use hardware similar to computer hardware are:

- I. The ATM
- II. Smartphones
- III. Smart Watches
- IV. Televisions **E.T.C.**

2. Peripherals for my computer includes:

- I. Joystick/Pads
- II. External mouse
- III. Cameras
- IV. Speakers
- V. Scanner **E.T.C33.**

3. On attempting to replace a hardware on my computer, I attempted replacing the keyboard and mouse with an external keyboard and mouse, all I did was to plug in the cables of both the keyboard and mouse to the appropriate USB ports of my computer.

Exercise 2.0

In completing all of these tasks, I followed the steps below;

- I. I right clicked on the free space of my desktop.
- II. I scrolled down the options to "new" and opted for folder.
- III. After creating the folder, I renamed it to CSC111 as specified above.
- IV. I opened the folder (CSC111) and followed the same procedures from i-iii to create the other folders (**OPERATING SYSTEM, MS WORD, MS EXCEL and POWERPOINT**) respectively.
- V. I created two additional folders called LEC and LAB for Lecture and laboratory respectively.
- VI. I highlighted LEC and LAB by holding on CTRL button and clicking LEC and LAB and then dragged it into the OPERATING SYSTEM folder.
- VII.** I repeated the same procedures in items e and f but I dragged folders into MS WORD, MS

EXCEL and POWERPOINT folders.

Exercise 2.1

In setting the date and time of my computer, I ;

- I. Right-clicked the time on the bottom right of the screen of my computer and then selected adjust date/time.
- II. A window opened, on the left side of the window, I selected the date & time tab. I made sure both "set time automatically" and "set the timezone automatically" were off and then I clicked on "change" under "change date and time".
- III. I entered the time and date to be 11:00am and 18/04/19 and then double-clicked on "change" to confirm my changes.

Exercise 3.0

Five uses of the Internet are?

- I. Research
- II. Education
- III. Shopping
- IV. Receiving information
- V. Job hunting

Exercise 3.1

Exercise 3.2

1. To create a new email address,

- I. I logged on to <https://accounts.google.com> on my browser, then I clicked on the create account button at the upper right corner of the page, a new tab opened.
- II. I entered my first name, last name, password, confirmed the password and then clicked next.
- III. The username became part of my email address and I entered my phone number, date of birth, and gender, then I clicked next to proceed.
- IV. I was redirected to the privacy and terms page which I agreed to and proceeded.
- V. Then I arrived at the welcome page, and proceeded to login on the Gmail app.

2. To send a mail of a news item found on <https://www.fulafia.edu.ng> as an attachment to cscfulafia2020@gmail.com;

- I. I logged on to <https://www.fulafia.edu.ng> on my browser and surfed through the portal to get a news item, I proceeded to save the Web page as a pdf on my computer, I went to Gmail and selected compose new mail.
- II. I clicked more: and located forward as an attachment, I then browse through the news item I saved on my computer and saved as a pdf on my computer and double clicked on the file to attach it to my mail.
- I. I added cscfulafia2020@gmail.com as my recipient and clicked on send at the bottom.

Exercise 4.0

1. To re-save an ms word document with the name "CSC111 Lecture Note.docx" saved in a folder on drive C: of my computer with the name "CSC111 Lecture Updated Note.docx" on my desktop, I'll have to locate the document on drive C: and open it, then I located the file tab at the top left corner and clicked on it, I clicked on save as and it directed me to a page where I'll decide the name and save location. I then selected the location to be my desktop and updated the name to be "CSC111 Lecture Note Updated" I selected the file type to be word document(*.docx), then clicked on the save button to save my file and verified that my file was saved before closing my document.

2a. In changing the texts of the above paragraph in question 2,

- I. I highlighted all the texts you wanted to change.
- II. In the menu bar, on the Home tab, I clicked on the Change Case icon, which has an uppercase 'A' and lowercase 'a.'
- III. A drop down menu appeared, showing "Sentence case, lower case, UPPERCASE, Capitalise Each Word and TOGGLE cASE" option and I clicked on the "UPPERCASE" option.

B. To italicise the first line of the paragraph;

- I. I highlighted the first line by double clicking the first text and dragging to the end of the first line.
- II. Then I clicked on the italic button (*_I_*) on the home tab of the worksheet.

C. To replace the word occurrences of "computer" to "workstation" I,

- I. Clicked on the Home tab
- II. Clicked the replace button in the editing section of the ribbon
- III. Typed the word "Computer" into the "find what" field
- IV. Then I typed "Workstation" into the "replace with" field and clicked on replace all button.

3. The shortcut keys for achieving;

- a. cut and paste
- b. copy and paste
- c. right align a paragraph are:

- a. Ctrl + X and Ctrl + V
- b. Ctrl + C and Ctrl + V
- c. Ctrl + R

Exercise 5.0

In creating a new blank presentation, I clicked the office button and opted for new on the drop-down list, the new presentation dialog box appeared, then I double clicked on blank presentation. A new presentation appeared, I then clicked and typed the title of my presentation in the "click to add title" area and I also typed subtitle in the "click to add subtitle" area. I created a title and content slide by selecting Home>New slide and I added a bullet pointed text and a title by selecting the bullet place holder and entering my text, each time I press enter, a new bullet appears. And I clicked the "click to add title" area to add title. I added another title and content slide by using the previous method and a table by finding the insert tab and clicking on table, and I selected the amount of rows and columns I wanted in the drop-down shown.

I tried adding another title and content slide by following the same process, then I added a video by clicking the video drop-down arrow, then selected video on my pc and located the desired video and clicked on insert.

And I played the video in slide show view using the view tab and entering the video on my slide, clicked the video tools playback tab, opened the "start" list and selected the play option. I then pressed the ESC button to drop out of slide show view back to normal view.

Exercise 6.0

Page 44

Any other three features of Excel Application and Worksheet Windows are:

Data validations

Add-ins

Hyperlinks

Exercise 6.0

Page 51

1. The steps required for adding a Cell Border are:

- I. Select the cell(s) where you want to add the border.
- II. Click the Border list arrow from the Home tab. A list of borders you can add to the selected cell(s) appears.
- III. Select a border type.

2. Adding a fill colour

- I. Select the cell(s) where you want to add the color.
- II. Click the Fill Color list arrow.
- III. A palate of theme colors is displayed in the menu. If you want to use a different color, select More Colors.
- IV. Select the color you want to apply. A background colour is applied to the cell.

Exercise 6.1

On the ms office home page, I navigated to the backstage and then clicked open.

I selected computer and then clicked browse, the open dialog box appeared, then I selected and opened my workbook, positioned my mouse over the column line in the column heading so the white cross becomes a double arrow, I clicked and dragged the column to the right to increase the column width, then I released the mouse and my column width was changed. I inserted a column between column A and column B by selecting column B and clicking the insert command on the Home tab, the new column appears in my worksheet. Then I deleted a row by clicking the row I

wanted to delete and clicking the delete command on the Home tab. I moved a column by placing my cursor over the top of the column I wanted to move and pressed and held the shift key on the keyboard and clicked and held the right border of the column I wanted to move and dragged it to the left, I released the mouse when I was happy with the location of the column. I used the text wrap command by selecting the cells with text that I wanted to wrap, then selected the wrap text command on the Home tab.

I then selected some cells and selected merge & center command on the Home tab.

Exercise 6.2

Steps required to create a function that calculate the total cost for a list of items using the sum function above are:

- I. Select the blank cell immediately following the cell to be summed up.
- II. In the Home tab, click "AutoSum". Alternatively, press the shortcut keys "Alt+= " together and without the inverted commas.
- III. The SUM formula appears in the selected cell. It shows the reference of the cells that have been summed up.
- IV. Press the "Enter" key. The output appears in the selected cell.

Exercise 6.3

1. Financial Functions includes;

- I. The NPV Function: The NPV or Net Present Value is the sum total of positive and negative cash flows over the years. "It calculates the net present value of an investment at a given discount rate, a series of negative values (future payments), and positive values (income),"
- II. The FV Function: The FV function gives you "the future value of a particular investment which has a constant interest rate and payments can be periodic, constant payments, or a single lump-sum payment,"
- III. The FVSCHEDULE Function: The FVSCHEDULE function helps you to calculate the future value of an investment with a variable interest rate.

2. Logical Functions includes;

- I. Not: The NOT function changes TRUE to FALSE, and FALSE to TRUE.
- II. Or: The OR function returns TRUE if any of the conditions are TRUE and returns FALSE if all conditions are false.
- III. And: The AND Function returns TRUE if all conditions are true and returns FALSE if any of the

conditions are false.

3. Text functions includes;

- I. Left(): You can use the Left function when you want to extract the leftmost characters from a string. Syntax =left(text, num_char)
- II. Rept (): Rept function in Excel is used when you want a certain text to be repeated certain number of times. Syntax =REPT(Text, number_times)
- III. Trim(): Trim function in Excel removes the unnecessary spaces from a particular string.
- IV. Syntax =TRIM(Text)

4. Date and Time functions includes;

- I. Now function; To get the current date and time
- II. Date function; To add a number of years, months and/or days
- III. Time function; To add a number of hours, minutes and/or seconds

Exercise 6.4

Filtering data in excel:

- I. Begin with a worksheet that identifies each column using a header row.
- II. Select the Data tab, then locate the Sort & Filter group.
- III. Click the Filter command.
- IV. Drop-down arrows will appear in the header of each column.
- V. Click the drop-down arrow for the column you want to filter.
- VI. The Filter menu appears.
- VII. Uncheck the boxes next to the data you don't want to view, or uncheck the box next to Select All to quickly uncheck all.
- VIII. Check the boxes next to the data you do want to view.
- IX. Click OK. All other data will be filtered, or temporarily hidden. Only the data you want to view will be visible.

Exercise 6.5

I opened my ms office and located an excel workbook, I double clicked to open and used the worksheet data to create a chart by selecting the cells I wanted to chart, including the column titles and row labels. From the insert tab, I clicked my desired chart command and choose my desired

chart type from the drop-down menu, the selected chart was then inserted in the worksheet.

I opted to change the chart layout by clicking the quick layout command, then choose the desired layout from the drop-down menu.

I changed the chart style by selecting the desired style from the chart styles group.

And I finally moved the chart by selecting the chart, clicking the design tab and then selecting the move chart command. The move chart dialog box appeared. I selected the desired location for the chart and clicked OK.

Exercise 6.6

Procedures required for fitting content before printing are;

- I. Click Page Layout. Click the small Dialog Box Launcher on the bottom right. This opens up the Page Setup dialog box.
- II. Select the Page tab in the Page Setup dialog box.
- III. Select Fit to under Scaling.
- IV. To fit your document to print on one page, choose 1 page(s) wide by 1 tall in the Fit to boxes.
- V. Press OK at the bottom of the Page Setup dialog box.

Modifying margins in the preview pane;

- I. View your document using Print Preview, as normal.
- II. Make sure the Ruler is displayed in the Print Preview mode. You can do this by clicking on the View Ruler button on the toolbar, the Show Ruler check box on the toolbar, or by choosing Ruler from the View menu. (The exact option you use depends on the version of Word you are using.)
- III. To adjust the top and bottom page margins, position the mouse pointer over one of the places on the vertical Ruler where the Ruler changes color (between gray and white or blue and white). The mouse pointer changes to a two-headed arrow, which you can drag to set a new margin.
- IV. To adjust the left and right page margins, use the same technique with the same spots on the horizontal Ruler at the top of the Print Preview window. Finding the spot on the right side of the Ruler is often easier than doing so on the left side because of the paragraph indent markers.
- V. Exit Print Preview or print your document, as desired.
